

## SIMPLE AND EASY START WITH TIMBERY MACHINES

We know the purchase of wood processing machine is a significant investment for many. With several brands out there, just a few separate themselves from the rest. At TIMBERY, our mission is to provide quality, easy to operate and maintain products at unbeatable prices. Timbery products have been designed according to customer's needs as machines with lots of functionality but also not expensive.

Combining 30+ years of experience in building industrial and portable machines, Timbery engineering set out to fill a growing need for a machines that would:

- be less expensive but work just as well or better
- include features and innovations not available anywhere else.

**When you choose Timbery, that experience and innovation translates to higher quality, a clean design, and simple sawing performance every time.**

# E100

## E100

**E100 with a 7.5 kW electric motor and optional tables**

### Twin blade edger

The E100 twin-blade edger is designed to be an affordable solution for sawmillers to boost their productivity.

Two 25 cm diameter circular blades are provided standard, one is fixed, and the other adjustable. Blade adjustment is done manually to easily and precisely adjust the distance between blades to produce accurately-sized timber. The edger is equipped with two power-feed tables. Edged boards are moved through the edger on a wide, flexible, rubber belt at a speed of 9 m/min. Optional 1 meter roller tables assist when cutting longer boards. Hold-down rollers keep the boards straight during the edging process. A removable board fence makes it easy to trim boards that already have one straight side. The E100 breaks down into a compact configuration for shipment. With a Timberly E100 you can **do more, and spend less.**

#### E100 SPECIFICATIONS

Power	Electric Motor 5.5 kW Electric Motor 7.5 kW 14 HP Gas Engine
Feed Speed	9 m/min
Circular Blade	250 mm
No. Blades	2
Max. Feed Width	520 mm
Max Cutting Width	300 mm
Min. Cutting Width	40 mm
Max. Cutting Thickness	50 mm
Min. Cutting Length	1100 mm
Optional Roller Table	1 m

#### E100 FEATURES:

5.5 kW or 7.5 kW Electric Motor

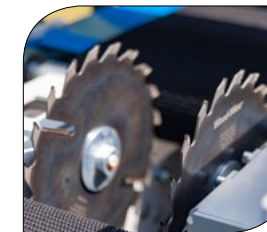

14 HP Gas Engine

Power-feed tables with a speed of 9 m/min.

Manual blade adjustment easily and precisely adjust the distance between blades to produce accurately-sized timber.

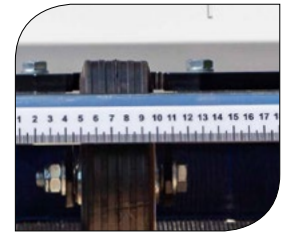

Two circular 25 cm blades - one fixed, and the other adjustable

Hold-down rollers keep the boards straight during edging

Scale indicates distance between blades with 1 mm accuracy

Additional scale when positioning board on the infeed table

Sawdust collection with port to dust extraction system

A removable board fence makes it easy to trim boards that already have one straight side

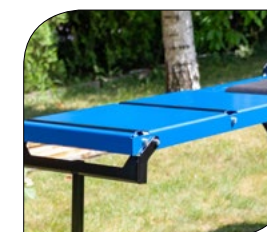

Table legs are attached directly to the edger's base

Ships on a single pallet

#### E100 ACCESSORIES:

Additional roller tables, length 1 m
