

AFFORDABLE SAWING STARTS WITH TIMBERY

We know the purchase of a sawmill, or similar equipment, is a significant investment for many. With several brands out there, just a few separate themselves from the rest.

At TIMBERY, our mission is to provide quality, easy to operate and maintain products at unbeatable prices.

Before you make your investment, we suggest comparing our products with the competition.

Look beyond the promotional brochures and videos and try the machines yourself.

Call a local dealer for a demonstration or look for us at a show.

Combining 30+ years of experience in building industrial and portable sawmills, Timbery engineering set out to fill a growing need for a sawmill that would:

- be less expensive but cut just as well or better
- include features and innovations not available anywhere else.

When you choose Timbery, that experience and innovation translates to higher quality, a clean design, and simple sawing performance every time.

M120

**M120 with 5.5 kW
Electric Motor**

M120

Simple – Compact - Convenient

The Timberly M120 sawmill is an entry-level sawmill that fits the needs of hobby sawyers, woodworkers and small woodlot owners. This sawmill comes standard with everything you would need to start sawing logs that are 660 mm diameter and 3.8 m long. To secure the log for sawing, the bed is equipped with 2 short and 2 tall quick-set log rests, and 1 quick-set cam action log clamp allowing for a 25 mm final cut. The cutting length can easily be extended to any length by adding 1.52 m bed extensions.

The M120 sawhead is easily pushed down the bed rails with a sturdy push bar and has a manual head crank to accurately set the blade height. We designed the M120 with the sawyer in mind with all adjustments to the sawhead conveniently made from the operator's location. The M120 also features a new stronger mast and sawhead design allowing for better stability while sawing.

M120 Specifications

Max. Cutting Length	3.8 m (standard bed)
Max. Log Diameter	660 mm
Last Board	25 mm
Max. Depth of Cut	190 mm
Widest Board	550 mm
Power	4 kW Electric Motor 5.5 kW Electric Motor 9.5 HP Gas Engine 14 HP Gas Engine
Blade	0,90 mm x 32 mm x 3355 mm 1.00 mm x 32 mm x 3355 mm
Profile	1.07 mm x 32 mm x 3355 mm 9/29 or 10/30
Blade Lubrication	Manual Valve
Bandwheel	400 mm
Feed System	Manual Push
