THE NEW PROFIMAT.

PLANING AND PROFILING
IN WEINIG QUALITY.

WEINIG OFFERS MORE.

TIME HAS COME FOR THE NEXT GENERATION.

When a joinery sets out to find a suitable successor, decisive questions arise: What does the next generation have to do to meet the increasing challenges of a rapidly changing industry? Who has the required maximum of speed, flexibility, reliability and quality needed to survive in the market in the long run?

With the new Profimat, WEINIG has found the answer to these and other questions. The planing and profiling machine follows in the footsteps of WEINIG's tried and tested solutions.

It builds on their strengths, optimizes them and adds advanced features.

Good to know: despite various innovations, the new Profimat does not require more space than comparable predecessor models.

Once it has been installed, you as a craftsman will enjoy a high degree of operating comfort and impressive smoothness with the new Profimat. Changeovers are faster and easier than ever.

TRADITION COMPELS

THE NEW PROFIMAT IS AVAILABLE IN TWO STRONG VERSIONS THAT ALREADY HAVE WHAT IT TAKES TO BECOME A LEGEND. WITH ANY OF THE TWO VERSIONS, YOU CAN BENEFIT FROM THE FOLLOWING FEATURES.

Broad-based

If you have big things to accomplish, the Profimat is available with an optimal working width of 260 mm. The standard width is 230 mm.

A reliable partner

Thanks to its compact, robust design and the omission of unnecessary features, the Profimat is astoundingly durable and requires little maintenance.

Smooth and precise

With its robust cast iron machine base and spindles in proven WEINIG quality, the Profimat ensures a high surface quality of all workpieces.

Maximum efficiency

Due to technical revisions the Profimat is surprisingly energy-saving. This is rewarded by subsidies or grants.

Everything under control

On request, the Profimat can be equipped with an intelligent control package for reproducible results at the push of a button – including a 10.1" display with intuitive user guidance. The width and thickness are automatically set to a nominal dimension. Alternatively the machine can be controlled manually.

Unlimited comfort and safety

The intuitive operability of the Profimat ensures short setup times, high user safety, pleasant operating comfort and consistently safe working.

THE SMALL BUT SIGNIFICANT DIFFERENCE

PROFIMAT 30

- » Configurable with 4 or 5 spindles
- » Feed speeds up to 15 m/min
- » Spindle speed 6,000 rpm

PROFIMAT 50

- » Configurable with 5 or 6 spindles
- » Feed speeds up to 30 m/min
- » Fully suitable for hardwood processing and sawing
- » Spindle speed 7,000 rpm (8,000 rpm optional)

High performance in a small space

Thanks to its compact design, the new Profimat does not require more space than comparable predecessor models.
